At BOGE, we were among the first to recognise this problem – and solve it. Highly efficient compressor controls Master controls for multiple compressor stations make compressed air production significantly more efficient – especially in cases where compressed air consumption fluctuates or where speed-regulated compressors are integrated into the network.

BOGE Compressors | Controls

BOGE has proven itself for many years. What makes this high-efficiency piston compressor so unique now and in the future is its proverbial flexibility: irrespective of the maximum compression ratio, not only can any final pressure required between 232 and 580 psig be produced – the primary pressure can also be
