C++ Network Programming ...

Network programming is inherently complex and doing it with a low-level C-style socket API makes it even more complex and error prone. Boost.Asio is an O-O C++ library that is, just like raw Sockets API, built around the concept of a socket. Roughly speaking, Boost.Asio wraps raw Sockets API and provides the

Where To Download Boost Asio C Network Programming Cookbook

developer with O-O interface to it.

Boost.Asio C++ Network Programming Cookbook

Network programming. Even though Boost.Asio can process any kind of data asynchronously, it is mainly used for network programming. This is because Boost.Asio supported network functions

Where To Download Boost Asio C Network Programming Cookbook

long before additional I/O objects were added. Network functions are a perfect use for asynchronous operations because the transmission of data over a network may take a long time, which means acknowledgments and errors may not be available as fast as the functions that send or receive data can execute.
