known as the alimentary canal), a hollow muscular tube extending from the mouth to the anus, and accessory organs, including the liver and pancreas. Technically, until food is absorbed in the intestines it is considered to be outside of the body.

Lab 8: Digestive System - Human Anatomy Lab Manual

The GI tract is a series of hollow organs joined in a long, twisting tube from the mouth to the anus. The hollow organs that make up the GI tract are the mouth, esophagus, stomach, small intestine, large intestine, and anus. The liver, pancreas, and gallbladder are the solid organs of the digestive system. The small intestine has three parts.
