also lists all kinds of other free goodies like free music, videos, and apps.

Erosion And Weathering A Cavern

Three of these caves are formed by erosion. They are 1. Solution Caves Solution Caves are formed when carbon in the Earth's atmosphere mixes with water, and forms acid rain. Acid Rain is a weak acid, but can weather and erode rocks down, which is how they are formed. 2. Sea Caves Sea caves are formed very simply: by water smashing up against rock.

Caves - Weathering and Erosion

much of upper limestone has been exposed by erosion of sandstone. In areas of exposed limestone there are sinkhole plains. Cave systems are forming. Some caverns have collapsed to form collapse sinks.
