Poor Numbers: How We Are Misled by African Development ...

Poor Numbers: How We Are Misled by African Development Statistics. by Jonathan Latham. by Morten Jerven Associate Professor, Simon Fraser University, Canada. On 5 November 2010, Ghana Statistical Services announced that it was revising national GDP estimates upwards by over 60 percent. After the revision a range of new activities, worth about US\$13 billion, were accounted for, and Ghana was thus upgraded from a low-income country to a lower-middle-income country.

Poor Numbers: How We Are Misled by African Development ...

LSE's Gerardo Serra calls Morten Jerven's book Poor Numbers: How we are misled by African Development Statistics and What to Do about It a pioneering attempt in opening the black box of African statistical offices. Statistical indicators, such as GDP, are the most synthetic and common measure of the success or failure of an economy.

Book Review: Poor Numbers: How We Are Misled by African ...

Poor Numbers (Morten Jerven) - book review. How We are Misled by African Development Statistics and What to do About It | The economic data for most countries in sub-Saharan Africa, and in particular GDP numbers, are so bad that they are almost useless without an understanding of the economic and statistical histories of individual countries...

Poor Numbers (Morten Jerven) - book review

The short answer is that the numbers are poor. This is just not a matter of technical accuracy – the arbitrariness of the quantification process produces observations with very large errors and levels of uncertainty.

Poor Numbers: how we are misled by African development ...

In his book Poor Numbers: How We Are Misled by African Development Statistics and What to Do About It, economic historian Morten Jerven tells the story of how Ghana did exactly the same thing in 2010.

Lies, statistics and why Africa's poor numbers really ...
