In 2012, more than 5.4 million tonnes of SBR were processed worldwide. About 50% of car tires are made from various types of SBR. The styrene/butadiene ratio influences the properties of the polymer: with high styrene content, the rubbers are harder and less rubbery. SBR is not

There's two main Styrene-Butadiene polymer types: Styrene-Butadiene Latex and Styrene-Butadiene Rubber (SBR). SBR has a higher butadiene content than Latex and this makes it more elastic-like.

Commercial Grades. styrene content typically between 23 and 40% (grades can also vary depending on the molecular weight).
