Have a wurlitzer 1958 model 2204 jukebox I bought in 1988, had amplifier rebuilt at the time playing fine for 30 years until a year ago. Changed all tubes, only has a muffled sound now. Think wiring or amp is a problem.

Wurlitzer dominated the coin-operated phonograph business until the introduction of the 45 rpm record. At that point, Wurlitzer's mechanism could handle up to 24 records, playing only one side. Seeburg introduced a new mechanism that held 50 records and could play both sides, yielding a true 100-select jukebox.
